PERMIT NO. ACT/015/032 INSPECTION DATE August 9, 1991

(Comments are Numbered to Correspond with Topics Listed Above)

1. Permits - An AVS check was made at Genwal. The mine submitted new documentation on direction and ownership to DOGM prior to inspection. An ad will be placed in the newspaper during the upcoming week. I viewed this article during inspection. The ad will run four consecutive weeks.
- 3a. Topsoil - The concern is in the winter during snow removal from the haul road. The encroachment on the topsoil pile in particular the use of salt may jeopardize the quality of the pile. This encroachment will correspond with the quality of snow fall. A higher barrier between road and topsoil pile is suggested.
- 4c. Sediment Ponds and Impoundments - At the time of inspection, the pond was not discharging and no problems were noted.
18. Support Facilities and Utility Installations - The crusher building was emitting coal dust which was very unnoticeable. Additional water may be needed with dust suppression additive.
